

TRAFFIC SAFETY FACTS 2012

*A Compilation of Motor Vehicle Crash Data from the
Fatality Analysis Reporting System and the General Estimates System*

2012 NATIONAL STATISTICS

POLICE-REPORTED MOTOR VEHICLE TRAFFIC CRASHES

Fatal	30,800
Injury	1,634,000
Property Damage Only	3,950,000
Total	5,615,000

TRAFFIC CRASH VICTIMS

	Killed	Injured
Occupants	22,912	2,134,000
Drivers	16,769	1,489,000
Passengers	6,061	644,000
Unknown	82	1,000
Motorcyclists	4,957	93,000
Nonoccupants	5,692	136,000
Pedestrians	4,743	76,000
Pedalcyclists	726	49,000
Other/Unknown	223	10,000
Total	33,561	2,362,000

OTHER NATIONAL STATISTICS

Vehicle Miles Traveled	2,968,815,000,000
Resident Population	313,914,040
Registered Vehicles	265,647,194
Licensed Drivers	211,814,830
Economic Cost of Traffic Crashes (2010) (estimate for reported and unreported crashes)	\$277 billion

NATIONAL RATES: FATALITIES

Fatalities per 100 Million Vehicle Miles Traveled	1.13
Fatalities per 100,000 Population	10.69
Fatalities per 100,000 Registered Vehicles	12.63
Fatalities per 100,000 Licensed Drivers	15.84

NATIONAL RATES: INJURED PERSONS

Injured Persons per 100 Million Vehicle Miles Traveled	80
Injured Persons per 100,000 Population	752
Injured Persons per 100,000 Registered Vehicles	889
Injured Persons per 100,000 Licensed Drivers	1,115

Fatality Analysis Reporting System and the General Estimates System*

National Highway Traffic Safety Administration

National Center for Statistics and Analysis

U.S. Department of Transportation

Washington, DC 20590

FOR MORE INFORMATION

Information on traffic fatalities is available from the National Center for Statistics and Analysis, NVS-424, 1200 New Jersey Avenue, SE, Washington, DC 20590. NCSA can be contacted at 800-934-8517 or e-mail ncsaweb@dot.gov. General information on highway traffic safety is online at www.nhtsa.gov/NCSA. To report a safety-related problem or to inquire about motor vehicle safety information, contact the Vehicle Safety Hotline at 888-327-4236. Fact sheets available from the National Center for Statistics and Analysis are *Alcohol-Impaired Driving, Bicyclists and Other Cyclists, Children, Large Trucks, Motorcycles, Occupant Protection, Older Population, Overview, Passenger Vehicles, Pedestrians, Race and Ethnicity, Rural/Urban Comparisons, School Transportation-Related Crashes, Speeding, State Alcohol Estimates, and Young Drivers*. The fact sheets and annual *Traffic Safety Facts* reports can be accessed online at www-nrd.nhtsa.dot.gov/CATS/index.aspx.

TABLES

TRENDS: General

1. Crashes by Crash Severity, 1988-2012	17
2. Persons Killed or Injured and Fatality and Injury Rates per Population, Licensed Drivers, Registered Vehicles, and Vehicle Miles Traveled, 1966-2012	18
3. Vehicles Involved in Crashes and Involvement Rates per Vehicle Miles of Travel and per Registered Vehicle by Vehicle Type and Crash Severity, 1975-2012	21
4. Persons Killed or Injured by Person Type and Vehicle Type, 1975-2012	23
5. Drivers Involved in Crashes and Involvement Rates per Licensed Driver by Sex and Crash Severity, 1975-2012	25

TRENDS: Occupants

6. Motor Vehicle Occupant and Motorcyclist Fatality and Injury Rates per Population by Age Group, 1975-2012	28
7. Passenger Car Occupants Killed or Injured and Fatality and Injury Rates per Registered Vehicle and Vehicle Miles of Travel, 1975-2012	30
8. Light Truck Occupants Killed or Injured and Fatality and Injury Rates per Registered Vehicle and Vehicle Miles of Travel, 1975-2012	32
9. Large Truck Occupants Killed or Injured and Fatality and Injury Rates per Registered Vehicle and Vehicle Miles of Travel, 1975-2012	34
10. Motorcyclists Killed or Injured and Fatality and Injury Rates per Registered Vehicle and Vehicle Miles of Travel, 1975-2012	36

TRENDS: Large Truck Related

11. Persons Killed or Injured in Crashes Involving a Large Truck by Person Type and Crash Type, 1975-2012	38
---	----

TRENDS: Nonoccupants

12. Nonoccupant Fatality and Injury Rates per Population by Age Group, 1975-2012	40
--	----

TRENDS: Alcohol

13. Persons Killed, by Highest Driver Blood Alcohol Concentration (BAC) in the Crash, 1982-2012 ...	42
14. Persons Killed and Percent Alcohol-Impaired Driving During Holiday Periods, 1982-2012	44
15. Drivers in Fatal Crashes by Blood Alcohol Concentration (BAC) and Time of Day, 1982-2012	46
16. Drivers in Fatal Crashes by Blood Alcohol Concentration (BAC) and Sex, 1982-2012	47
17. Drivers in Fatal Crashes by Blood Alcohol Concentration (BAC) and Vehicle Type, 1982-2012 ...	48
18. Drivers in Fatal Crashes by Blood Alcohol Concentration (BAC) and Age, 1982-2012	50
19. Drivers in Fatal Crashes by Blood Alcohol Concentration (BAC) and Survival Status, 1982-2012 ...	54
20. Pedestrians Killed, 14 Years and Older, by Blood Alcohol Concentration (BAC), 1982-2012	55

TRENDS: Restraints

21. Drivers of Passenger Cars and Light Trucks in Crashes by Crash Severity and Restraint Use, 1975-2012	56
22. Occupants of Passenger Cars and Light Trucks Killed or Injured, by Restraint Use, 1975-2012	58

TRENDS: Rollover

23. Passenger Car and Light Truck Occupants Killed, by Vehicle Type and Rollover Occurrence, 1982-2012	60
--	----

Tables (Continued)

CRASHES: Time

24. Crashes and Crash Rates by Month and Crash Severity	64
25. Crashes by Time of Day, Day of Week, and Crash Severity	65
26. Crashes by Weather Condition, Light Condition, and Crash Severity	67
27. Fatal Crashes by Emergency Medical Services (EMS) Response Times Within Designated Minutes and by Land Use	68

CRASHES: Location

28. Crashes by Crash Type, Relation to Roadway, and Crash Severity	69
--	----

CRASHES: Circumstances

29. Crashes by First Harmful Event, Manner of Collision, and Crash Severity	70
30. Two-Vehicle Crashes by Vehicle Type and Crash Severity	71

CRASHES: Alcohol

31. Fatal Crashes and Percent Alcohol-Impaired Driving, by Time of Day and Crash Type	72
---	----

VEHICLES: All Vehicles

32. Vehicles Involved in Crashes by Relation to Junction, Traffic Control Device, and Crash Severity ...	78
33. Vehicles Involved in Crashes by Speed Limit, Crash Type, and Crash Severity	79
34. Vehicles Involved in Fatal Crashes by Speed Limit and Land Use	80
35. Vehicles Involved in Crashes by Number of Lanes, Trafficway Flow, and Crash Severity	81
36. Vehicles Involved in Crashes by Vehicle Type and Crash Severity	82
37. Vehicles Involved in Fatal Crashes by Body Type	83
38. Vehicles Involved in Crashes by Vehicle Type, Rollover Occurrence, and Crash Severity	84
39. Vehicles Involved in Crashes by Vehicle Type, Fire Occurrence, and Crash Severity	86
40. Vehicles Involved in Single- and Two-Vehicle Crashes by Vehicle Maneuver and Crash Severity ...	87
41. Vehicles Involved in Fatal Crashes by Roadway Function Class, Crash Type, and Hazardous Cargo	88

VEHICLES: Passenger Cars

42. Passenger Cars Involved in Crashes by Most Harmful Event and Crash Severity	91
43. Passenger Cars Involved in Crashes by Initial Point of Impact, Crash Severity, and Crash Type	92

VEHICLES: Light Trucks

44. Light Trucks Involved in Crashes by Most Harmful Event and Crash Severity	93
45. Light Trucks Involved in Crashes by Initial Point of Impact, Crash Severity, and Crash Type	94

VEHICLES: Large Trucks

46. Large Trucks Involved in Crashes by Most Harmful Event and Crash Severity	95
47. Large Trucks Involved in Crashes by Initial Point of Impact, Crash Severity, and Crash Type	96
48. Large Trucks Involved in Crashes by Truck Type, Rollover Occurrence, and Crash Severity	97
49. Truck Tractors with Trailers Involved in Crashes by Number of Trailers, Jackknife Occurrence, and Crash Severity	98

Tables (Continued)

VEHICLES: Motorcycles

- 50. Motorcycles Involved in Crashes by Most Harmful Event and Crash Severity 99
- 51. Motorcycles Involved in Crashes by Initial Point of Impact, Crash Severity, and Crash Type 100

VEHICLES: Buses

- 52. Buses Involved in Crashes by Most Harmful Event and Crash Severity 101
- 53. Buses Involved in Crashes by Initial Point of Impact, Crash Severity, and Crash Type 102

PEOPLE: All Victims

- 54. Persons Killed or Injured, by Person Type and Injury Severity 106
- 55. Persons Killed or Injured, by Age and Injury Severity 106
- 56. Persons Killed or Injured, by Sex and Injury Severity 106
- 57. Persons Killed or Injured and Fatality and Injury Rates per 100,000 Population, by Age and Sex 108
- 58. Persons Killed or Injured in Crashes, by Weather Condition and Light Condition 110
- 59. Persons Killed in Crashes and Percent Alcohol-Impaired Driving Fatalities,
by Time of Day and Crash Type 110
- 60. Persons Killed in Work Zones, by Roadway Function Class and Person Type 112
- 61. Persons Killed in Crashes Involving Emergency Vehicles, by Person Type, Crash Type,
and Vehicle Type 112

PEOPLE: Drivers

- 62. Driver Involvement Rates per 100,000 Licensed Drivers, by Age, Sex, and Crash Severity 115
- 63. Drivers and Motorcycle Riders Involved in Fatal Crashes, by Previous Driving Record
and License Type Compliance 117
- 64. Related Factors for Drivers and Motorcycle Riders Involved in Fatal Crashes 117

PEOPLE: Occupants

- 65. Vehicle Occupants Killed or Injured, by Vehicle Type, Person Type, and Injury Severity 118
- 66. Vehicle Occupants Killed or Injured in Crashes, by Speed Limit and Crash Type 119
- 67. Vehicle Occupants Killed in Crashes, by Speed Limit and Land Use 120
- 68. Vehicle Occupants Killed or Injured, by Sex and Vehicle Type 121
- 69. Vehicle Occupants Killed or Injured, by Age and Vehicle Type 122
- 70. Vehicle Occupants Killed or Injured, by Age, Person Type, and Sex 123
- 71. Vehicle Occupants Killed or Injured, by Vehicle Type and Most Harmful Event 124
- 72. Vehicle Occupants Killed or Injured, by Initial Point of Impact and Vehicle Type 125
- 73. Vehicle Occupants Killed or Injured, by Vehicle Type and Ejection 126
- 74. Occupants Killed or Injured in Two-Vehicle Crashes, by Vehicle Types Involved 127
- 75. Occupants Involved in Fatal Crashes and Occupant Fatalities, by Vehicle Body Type 128
- 76. Passenger Car Occupants Involved in Fatal Crashes and Occupants Killed, by Car Wheelbase Size .. 129

Tables (Continued)

PEOPLE: Alcohol

77. Persons Killed and Alcohol-Impaired Driving Fatalities, by Person Type	130
78. Drivers and Motorcycle Riders Involved in Fatal Crashes, by Age and Driver's Blood Alcohol Concentration (BAC).....	130
79. Drivers and Motorcycle Riders Killed in Crashes, by Time of Day, Day of Week, Age, Alcohol Impairment, and Crash Type	132
80. Drivers and Motorcycle Riders Killed in Crashes, by Age and Driver's Blood Alcohol Concentration (BAC).....	132
81. Drivers and Motorcycle Riders Involved in Fatal Crashes, by Vehicle Type and Driver's Blood Alcohol Concentration (BAC).....	134
82. Persons Killed, by Age and Highest Driver Blood Alcohol Concentration (BAC) in the Crash	135
83. Pedestrians Killed, by Pedestrian's and Driver's Blood Alcohol Concentration (BAC)	135

PEOPLE: Restraints

84. Drivers Involved in Crashes, by Vehicle Type, Restraint Use, and Crash Severity	136
85. Passenger Car and Light Truck Occupants Killed or Injured, by Age and Restraint Use	137
86. Passenger Car and Light Truck Occupant Survivors of Fatal Crashes, by Age and Restraint Use	138
87. Passenger Car Occupants Killed or Injured, by Seating Position and Restraint Use	139
88. Light Truck Occupants Killed or Injured, by Seating Position and Restraint Use	140
89. Passenger Car and Light Truck Occupants Killed or Injured, by Restraint Use and Type of Restraint	141

INTRODUCTION

In this annual report, *Traffic Safety Facts 2012: A Compilation of Motor Vehicle Crash Data from the Fatality Analysis Reporting System and the General Estimates System*, the National Highway Traffic Safety Administration (NHTSA) presents descriptive statistics about traffic crashes of all severities, from those that result in property damage to those that result in the loss of human life.

Information from two of NHTSA's primary data systems has been combined to create a single source for motor vehicle crash statistics. The first data system, the Fatality Analysis Reporting System (FARS), is probably the better known of the two sources. Established in 1975, FARS contains data on the most severe traffic crashes, those in which someone was killed. The second source is the National Automotive Sampling System General Estimates System (GES), which began operation in 1988. GES contains data from a nationally representative sample of police-reported crashes of all severities, including those that result in death, injury, or property damage. The next two sections provide a brief description of FARS and GES.

Both systems were designed and developed by NHTSA's National Center for Statistics and Analysis (NCSA) to provide an overall measure of highway safety, to help identify traffic safety problems, to suggest solutions, and to help provide an objective basis on which to evaluate the effectiveness of motor vehicle safety standards and highway safety initiatives. Data from these systems are used to answer requests for information from the international and national highway traffic safety communities, including State and local governments, the Congress, Federal agencies, research organizations, industry, the media, and private citizens.

FARS OPERATIONS

The Fatality Analysis Reporting System (FARS), which became operational in 1975, contains data on a census of fatal traffic crashes within the 50 States, the District of Columbia, and Puerto Rico. To be included in FARS, a crash must involve a motor vehicle traveling on a trafficway customarily open to the public, and must result in the death of an occupant of a vehicle or a nonoccupant within 30 days of the crash.

NHTSA has a cooperative agreement with an agency in each State's government to provide information on all qualifying fatal crashes in the State. These agreements are managed by Regional Contracting Officer's Technical Representatives located in the 10 NHTSA Regional Offices. Trained State employees, called "FARS Analysts," are responsible for gathering, translating, and transmitting their State's data to NCSA in a standard format. The number of analysts varies by State, depending on the number of fatal crashes and the ease of obtaining data.

FARS data are obtained solely from the State's existing documents:

Police Accident Reports	Death Certificates
State Vehicle Registration Files	Coroner/Medical Examiner Reports
State Driver Licensing Files	Hospital Medical Reports
State Highway Department Data	Emergency Medical Service Reports
Vital Statistics	Other State Records

From these documents, the analysts code more than 100 FARS data elements. (See Appendix A for a list of the FARS data elements.) The specific data elements may be modified slightly each year to conform to changing user needs, vehicle characteristics, and highway safety emphasis areas. The data collected within FARS do not include any personal identifying information, such as names, addresses, or social security numbers. Thus, any data kept in FARS files and made available to the public fully conform to the Privacy Act.

Each analyst enters data into a local microcomputer data file, and daily updates are sent to NHTSA's central computer database. Data are automatically checked when entered for acceptable range values and for consistency, enabling the analyst to make corrections immediately. Several programs continually monitor and improve the completeness and accuracy of the data. The 2012 FARS data file used for the statistics in this report was created in August 2013; however, the 2012 FARS file was *officially* closed in March 2014. This additional time provides the opportunity for submission of important variable data requiring outside sources, which may lead to changes in the final counts. The updated final counts for 2011 are reflected in this report. The updated final counts for 2012 will be reflected in the 2013 annual report.

The National Automotive Sampling System (NASS) - General Estimates System (GES) data are obtained from a nationally representative probability sample selected from all police-reported crashes. The system began operation in 1988. To be eligible for the GES sample, a police accident report (PAR) must be completed for the crash, and the crash must involve at least one motor vehicle traveling on a trafficway and must result in property damage, injury, or death. Although various sources suggest that about half the motor vehicle crashes in the country are not reported to police, the majority of these unreported crashes involve only minor property damage and no significant personal injury. By restricting attention to police-reported crashes, the GES concentrates on those crashes of greatest concern to the highway safety community and the general public.

GES data collectors make weekly visits to 410 police jurisdictions in 60 sites across the United States, where they randomly sample about 57,000 PARs per year. The collectors obtain copies of the PARs and send them to the NASS quality control centers for coding. No other data are collected beyond the selected PARs—no driver license, vehicle registration, or medical information is obtained.

Trained data entry personnel interpret and code data directly from the PARs into an electronic data file. Approximately 90 data elements are coded into a common format. (See Appendix B for a list of the GES data elements.) Some elements are modified every other year to meet the changing needs of the highway safety community. To protect individual privacy, no personal information (names, addresses, specific crash locations) is coded. During data coding, the data are checked electronically for validity and consistency. After the data file is created, further quality checks are performed on the data through computer processing and by the data coding supervisors. The 2012 file used for the statistics in this report was completed in August 2013.

ABOUT THIS REPORT

Fatal crash data from FARS and nonfatal crash data from GES are presented in this report in five chapters. Chapter 1, “Trends,” presents data from all years of FARS (1975 through 2012) and GES (1988 through 2012). The remaining chapters present data only from 2012. Chapter 2, “Crashes,” describes general characteristics of crashes, such as when and how often they occurred, where they occurred, and what happened during the crash. Chapter 3, “Vehicles,” concentrates on the types of vehicles involved in crashes and the damage to the vehicles. Chapter 4, “People,” is the largest chapter of this report, with statistics about drivers, passengers, pedestrians, and pedalcyclists. The last chapter of the report, “States,” contains information about crashes for each State, the District of Columbia, and Puerto Rico. Terms used throughout the report are defined in the Glossary.

About three-quarters of the tables in this report present data from both FARS and GES. The remaining tables contain FARS data only. Statistics describing fatal crashes or fatalities have been derived from FARS. Statistics describing injury crashes, property-damage-only crashes, or nonfatal injuries have been derived from GES. The reader should be aware that FARS numbers are actual counts of fatalities or fatal crashes, whereas GES numbers are estimates of counts of crashes and injuries and are subject to sampling and nonsampling errors. (See Appendix C for more information on these errors.) To emphasize this difference, FARS numbers are not rounded, while GES estimates have been rounded to the nearest thousand. As a result of the rounding, for some tables, the sum of the row or column entries may not equal the row or column total. In addition, percentages have been calculated prior to rounding.

The reader may also notice that many tables have rows or footnotes for “unknowns” for FARS data, but not for GES data. The reason for this difference is that almost all the GES unknown data have been assigned values through complex statistical procedures. FARS unknown data, on the other hand, are not assigned values, with the exception of blood alcohol concentration (BAC) test results. When the alcohol test results are unknown, BAC values have been assigned to drivers and nonoccupants involved in fatal crashes, using a method of *multiple imputation* that was revised in 2001. More information on the multiple imputation method, including detailed tabulations of alcohol involvement in various categories (age, sex, time of day, etc.), is available in NHTSA Technical Report DOT HS 809 403, *Transitioning to Multiple Imputation: A New Method to Estimate Missing Blood Alcohol Concentration (BAC) Values in FARS*.

2012 FARS/NASS GES Standardization

There have been significant changes to FARS and NASS GES data as a result of the standardization of data elements between the two systems. The FARS/NASS GES Standardization began in 2006, with the second phase being implemented in the 2010 data collection year. The definition and element attribute changes introduced in 2010 are the most substantive and most numerous changes that have been made in one year in the reconciliation of the FARS and NASS GES data systems. As a single, unified data entry system, FARS/NASS GES will be compatible with the Model Minimum Uniform Crash Criteria (MMUCC), the guideline used by nearly all States to develop and revise their crash forms and databases. Once complete, the FARS/NASS GES standardization will simplify crash data coding and analysis, as well as reducing costs and errors.

Probably the most notable changes are the introduction of precrash information in FARS (already collected in NASS GES) and a change in “case structure,” or how the groups of related data elements are organized. The structure changes include changes to how the data are now stored and made available. For example, for FARS, there are now 16 data tables rather than 4, as a result of the change in the number of coding forms and the changes

About This Report

in specific data elements. Several data elements that previously allowed only a specified number of responses now have a “select-all-that-apply” format. There is a separate data table for each of those data elements. The precrash information represents not only a new coding form but, more importantly, a largely new concept for FARS by attempting to collect data about the conditions, events, and driver actions that preceded and may have contributed to the crash. Precrash data, which have been included in NASS GES since 1992, are intended to improve crash avoidance research.

The new FARS Precrash Form information consists of 23 data elements, 9 of which were previously coded at the Crash level and 3 each at the Vehicle and Driver levels, and 8 new data elements. Nine trafficway descriptor data elements have been moved from the Crash level to the new Precrash level. These elements provide details about the characteristics of the trafficway selected for each vehicle.

Type of Intersection has been added to both systems. Bus Use and Vehicle Configuration are two Vehicle-level elements that are new to NASS GES in 2010 and modified for FARS (element attributes were consolidated and redefined). Condition at Time of Crash has been added at the Driver level and at the Non-Motor Vehicle Occupant level for both systems. For motor vehicle occupants, there is now an Indication of Misuse of Restraint System or Helmet Use in both systems.

Some of the information that had been collected under FARS Related Factors has been redistributed to new data elements. For example, some Person-Related Factors have been removed and are now captured in two new Non-Motor-Vehicle Occupant elements: Non-Motorist Action/Circumstances Prior to Crash; and Non-Motorist Action/Circumstances at Time of Crash. Some Vehicle-Related Factors are now captured under three new precrash elements: Contributing Circumstances, Motor Vehicle, and Driver Distracted By. The Driver Level element, Violations Charged, is now a “Select All That Apply” element.

Changes from the *Traffic Safety Facts 2011* Report

- In the Trends chapter, Tables 1, 2, 3, 4, 5, 6, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, and 22 have been expanded to show data for all years, from 1975 through 2012 for FARS data and from 1988 through 2012 for GES data.
- Table 128 (State Traffic Safety Laws) has been deleted from the States chapter, and a new table (Motor Vehicle Traffic Fatalities and Fatality Rates, 1899-2012) has been added on the last page of the report.
- Vehicle registration data for passenger vehicles (cars and light trucks) were obtained from R.L. Polk’s National Vehicle Population Profile (NVPP), which is a compilation of all passenger vehicles that have been registered in compliance with State requirements. Subsequently, overall registrations and passenger car and light truck vehicle miles traveled were revised by NHTSA, using a combination of Polk and Federal Highway Administration (FHWA) exposure data.

Polk recently enhanced the data quality of its NVPP, which resulted in a complete rewrite of the data, as a result of: (1) enhanced business rules for vehicles on the road, (2) more consistent reporting/processing across States, and (3) upgraded basis for vehicle coding. A comparison of Polk’s Old NVPP and New NVPP for 2011 shows that the enhancements resulted in an increase of more than 3 percent in NHTSA’s passenger vehicle registration counts, consisting of a 5.6 percent decrease in the 2011 passenger car count and a 14.6 percent increase in the 2011 light truck count from the Old NVPP to the New NVPP, as shown in the table on page 9. This report uses 2012 data, as well as 2011 data updated from the data presented in the *Traffic Safety Facts 2011* report, for passenger car and light truck registrations based on Polk’s New NVPP. Consequently, the 2011 and 2012 data in this report for vehicle registrations and vehicle miles traveled are not strictly comparable with the data for all prior years, which were based on Polk’s Old NVPP.

About This Report

Registered Vehicles: NCSA Revised Using Polk and FHWA Data

Year	Passenger Cars (Polk)	Light Truck (Polk)	Motorcycles (FHWA)	Buses (FHWA)	Large Trucks (FHWA)	NCSA Revised Total
2009 (Old NVPP)	137,203,972	102,008,600	7,929,724	841,993	10,973,214	258,957,503
2010 (Old NVPP)	135,310,480	102,376,147	8,009,503	846,051	10,770,054	257,312,235
2011 (Old NVPP)	134,543,655	103,594,529	8,437,502	666,064	10,270,693	257,512,443
2011 (New NVPP)	126,974,845	118,694,258	8,437,502	666,064	10,270,693	265,043,362
2012 (New NVPP)	127,091,286	118,677,080	8,454,939	764,509	10,659,380	265,647,194

Vehicle Miles Traveled: Polk and FHWA

Year	Passenger Cars (Revised FHWA Using Polk)	Light Trucks (Revised FHWA Using Polk)	Motorcycles (FHWA)	Buses (FHWA)	Large Trucks (FHWA)	Total (FHWA)
2009 (Old NVPP)	1,510,339	1,122,909	20,822	14,387	288,306	2,956,764
2010 (Old NVPP)	1,507,716	1,140,740	18,513	13,770	286,527	2,967,266
2011 (Old NVPP)	1,497,460	1,152,998	18,542	13,807	267,594	2,950,402
2011 (New NVPP)	1,369,898	1,280,560	18,542	13,807	267,594	2,950,402
2012 (New NVPP)	1,377,833	1,286,612	21,298	14,755	268,318	2,968,815

Note: NHTSA NCSA revises FHWA's Passenger Car and Light Truck vehicle miles traveled (VMT) using Polk's registration counts.

DATA AVAILABILITY

While this report presents a wide spectrum of information in more than 100 tables and figures, it contains only a fraction of the data available from FARS and GES. Additional data from FARS (1975 through 2012) or from GES (1988 through 2012) are available in four ways:

- Modest requests for specific data will be answered by NCSA at no charge. Response usually requires about two weeks, depending on the nature and complexity of the data requested.
- Compact disks can be purchased in one of several formats amenable to analysis. This will enable you to process the data using your own computer system. Information on acquiring the compact disks is available by contacting the Volpe Center at the following address:

Attn: Rita Da Silva
USDOT Volpe National Transportation Systems Center (RTV-5E)
55 Broadway
Cambridge, MA 02142
617-494-3088
dasilva@volpe.dot.gov

- FARS and GES data can be obtained by downloading any of the published files from the Internet, at <ftp://ftp.nhtsa.dot.gov/FARS> or <ftp://ftp.nhtsa.dot.gov/GES>. The files are available in SAS, sequential ASCII, and (for FARS only, not GES) DBF file formats. This will enable you to process the data using your own computer system.
- FARS data can also be accessed on the Web at www-fars.nhtsa.dot.gov. This Web site provides instant access to the 1994 through 2012 FARS data via the Create-a-Query, Create-a-Map, and Reports features. The Create-a-Query feature will enable you to process the data using our interactive user interface. The Create-a-Map feature will enable you to create State-by-State and county-by-county map displays from an inventory of report selections. The Reports feature is an inventory of the fatality statistical reports found in this publication. These are national reports for current and past years that may be customized by selection of State; and for State reports, county tabulation may be selected.

VEHICLE SAFETY HOTLINE

To report a safety-related problem or to inquire about motor vehicle safety information, contact the Vehicle Safety Hotline at 888-327-4236.

Data Availability

Requests for more information from FARS or GES should be directed to:

National Highway Traffic Safety Administration
National Center for Statistics and Analysis
NVS-424
1200 New Jersey Avenue, SE
Washington, DC 20590
202-366-4198 or 800-934-8517
Email: NCSAWeb@dot.gov

Requests for more information may also be submitted online via NCSA's Customer Automated Tracking System (CATS):

<http://www-nrd.nhtsa.dot.gov/CATS/index.aspx>

Additional information on all NHTSA's data files, including FARS and GES, can be found on the NCSA Web site: <http://www.nhtsa.gov/NCSA>. Fact sheets, recent NCSA research notes, and abstracts of technical reports can be downloaded in portable document format (PDF). Comments and suggestions about the NCSA Web site can be e-mailed to the following address: ncsaweb@dot.gov.

Chapter 1

TRENDS

CHAPTER 1 ■ TRENDS

The tables in this chapter present statistics about police-reported motor vehicle crashes over time. Trends for fatal crashes and fatalities generally are presented from 1975 (when FARS began operation) to 2012; however, tables with alcohol data from FARS show data only for the years these data are available—1982 to 2012. Trends for nonfatal crashes and injured are presented from 1988 (when GES began operation) to 2012. Care should be taken when comparing nonfatal crash and injury statistics from one year to the next. Since the statistics derived from GES data are estimates, year-to-year differences may be the result of the sampling process, not the result of an actual trend. The variability or sampling errors associated with the estimates must be considered when making any year-to-year comparisons using GES data. (For more information on sampling error, see Appendix C.) Below are some of the statistics you will find in this chapter:

- Fatal crashes increased by 3.1 percent from 2011 to 2012, and the fatality rate rose to 1.13 fatalities per 100 million vehicle miles of travel in 2012.
- The injury rate increased by 6.7 percent from 2011 to 2012, to 80 persons injured per 100 million vehicle miles of travel in 2012.
- The occupant fatality rate (including motorcyclists) per 100,000 population, which declined by 22.7 percent from 1975 to 1992, decreased by 31.1 percent from 1992 to 2012.
- The occupant injury rate (including motorcyclists) per 100,000 population, which declined by 13.6 percent from 1988 to 1992, decreased by 37.8 percent from 1992 to 2012.
- The nonoccupant fatality rate per 100,000 population has declined by 54.6 percent from 1975 to 2012.
- The nonoccupant injury rate per 100,000 population has declined by 45.6 percent from 1988 to 2012.
- The percent of alcohol-impaired driving fatalities has declined from 48 percent in 1982 to 31 percent in 2012.

2009	33,883	306,772	11.05	209,618	16.16	258,958	13.08	2,957	1.15
2010	32,999	309,326	10.67	210,115	15.71	257,312	12.82	2,967	1.11
2011	32,479	311,588	10.42	211,875	15.33	265,043	12.25	2,950	1.10
2012	33,561	313,914	10.69	211,815	15.84	265,647	12.63	2,969	1.13

Notes: Some States include restricted driver licenses and graduated driver licenses in their licensed driver counts. Due to an enhancement in the registration data provided by R.L. Polk & Co. for 2011 and 2012, registration counts for those years changed considerably from the counts provided for 2010 and earlier years. This should be taken into account when comparing registration numbers and rates per registered vehicle for 2010 and earlier years with those for 2011 and later years. For more details, see "Changes from the *Traffic Safety Facts 2011 Report*" on page 8.

Notes: See Tables 7 through 10 for notes regarding an enhanced methodology used to estimate registered vehicles and vehicle miles traveled for 2007 and after. Due to an enhancement in the registration data provided by R.L. Polk & Co. for 2011 and 2012, registration counts for those years changed considerably from the counts provided for 1975 through 2010. This should be taken into account when comparing registration numbers and rates per registered vehicle for 2010 and earlier years with those for 2011 and later years. For more details, see "Changes from the *Traffic Safety Facts 2011 Report*" on page 8.

Notes: See Tables 7 through 10 for notes regarding an enhanced methodology used to estimate registered vehicles and vehicle miles traveled for 2007 and after. Due to an enhancement in the registration data provided by R.L. Polk & Co. for 2011 and 2012, registration counts for those years changed considerably from the counts provided for 1975 through 2010. This should be taken into account when comparing registration numbers and rates per registered vehicle for 2010 and earlier years with those for 2011 and later years. For more details, see "Changes from the *Traffic Safety Facts 2011 Report*" on page 8.

*Injury data not available before 1988.

Notes: In 2011, the Federal Highway Administration implemented an enhanced methodology for estimating registered vehicles and vehicle miles traveled by vehicle type. These revisions were applied to data from 2007 through 2012. In some cases the changes were significant and should be taken into account when comparing registered vehicle counts and/or vehicle miles traveled for 2006 and earlier years with the numbers for 2007 and later years. Due to an enhancement in the passenger vehicle registration data provided by R.L. Polk & Co. for 2011 and 2012, registration counts for those years changed considerably from the counts provided for 2010 and earlier years. This should be taken into account when comparing registration numbers and rates per registered vehicle for passenger cars for 2010 and earlier years with those for 2011 and later years. For more details, see "Changes from the *Traffic Safety Facts 2011* Report" on page 8.

*Injury data not available before 1988.

Notes: In 2011, the Federal Highway Administration implemented an enhanced methodology for estimating registered vehicles and vehicle miles traveled by vehicle type. These revisions were applied to data from 2007 through 2012. In some cases the changes were significant and should be taken into account when comparing registered vehicle counts and/or vehicle miles traveled for 2006 and earlier years with the numbers for 2007 and later years. Due to an enhancement in the passenger vehicle registration data provided by R.L. Polk & Co. for 2011 and 2012, registration counts for those years changed considerably from the counts provided for 2010 and earlier years. This should be taken into account when comparing registration numbers and rates per registered vehicle for light trucks for 2010 and earlier years with those for 2011 and later years. For more details, see "Changes from the *Traffic Safety Facts 2011 Report*" on page 8.

2012	356 (3)	39	377 (3)	44	179 (1)	44

*Highest blood alcohol concentration (BAC) among drivers or motorcycle riders involved in the crash was .08 grams per deciliter (g/dL) or greater. NHTSA estimates alcohol involvement when alcohol test results are unknown. For more information, see page 7 of this report.

**The number of whole days in the holiday period is shown in parentheses. The length of the holiday period depends on the day on which the legal holiday falls, as follows:

- If the holiday falls on *Monday*, the holiday period is from 6:00 pm Friday to 5:59 am Tuesday.
- If the holiday falls on *Tuesday*, the holiday period is from 6:00 pm Friday to 5:59 am Wednesday.
- If the holiday falls on *Wednesday*, the holiday period is from 6:00 pm Tuesday to 5:59 am Thursday.
- If the holiday falls on *Thursday*, the holiday period is from 6:00 pm Wednesday to 5:59 am Monday.
- If the holiday falls on *Friday*, the holiday period is from 6:00 pm Thursday to 5:59 am Monday.
- Number of days and number of hours incorporated: 1 day (36 hours), 2 days (60 hours), 3 days (84 hours), 4 days (108 hours).

***No data available.

2012	390 (3)	38	416 (4)	42	362 (4)	37

*Highest blood alcohol concentration (BAC) among drivers or motorcycle riders involved in the crash was .08 grams per deciliter (g/dL) or greater. NHTSA estimates alcohol involvement when alcohol test results are unknown. For more information, see page 7 of this report.

**The number of whole days in the holiday period is shown in parentheses. The length of the holiday period depends on the day on which the legal holiday falls, as follows:

- If the holiday falls on *Monday*, the holiday period is from 6:00 pm Friday to 5:59 am Tuesday.
- If the holiday falls on *Tuesday*, the holiday period is from 6:00 pm Friday to 5:59 am Wednesday.
- If the holiday falls on *Wednesday*, the holiday period is from 6:00 pm Tuesday to 5:59 am Thursday.
- If the holiday falls on *Thursday*, the holiday period is from 6:00 pm Wednesday to 5:59 am Monday.
- If the holiday falls on *Friday*, the holiday period is from 6:00 pm Thursday to 5:59 am Monday.
- Number of days and number of hours incorporated: 1 day (36 hours), 2 days (60 hours), 3 days (84 hours), 4 days (108 hours).

***No data available.

*Total includes occupants of other and unknown light trucks.

Chapter 2

CRASHES

CHAPTER 2 ■ CRASHES

This chapter presents statistics about police-reported motor vehicle crashes according to the most severe injury in the crash: **Fatal**, **Nonfatal Injury** (Injury), and **Property Damage**. The tables and figures are presented in four groups: Time, Location, Circumstances, and Alcohol. Below are some of the crash statistics you will find in this section:

- More than 5.6 million police-reported motor vehicle crashes occurred in the United States in 2012. Twenty-nine percent of those crashes (1.63 million) resulted in an injury, and fewer than 1 percent (30,800) resulted in a death.
- Midnight to 3 a.m. on Saturdays and Sundays proved to be the deadliest 3-hour periods throughout 2012, with 988 and 1,050 fatal crashes, respectively.
- Sixty-one percent of fatal crashes involved only one vehicle, as compared with 32 percent of injury crashes and 30 percent of property-damage-only crashes.
- Collision with another motor vehicle in transport was the most common first harmful event for fatal, injury, and property-damage-only crashes. Collisions with fixed objects and noncollisions accounted for only 18 percent of all crashes, but they accounted for 45 percent of fatal crashes.
- Thirty percent of all fatal crashes involved alcohol-impaired driving, where the highest blood alcohol concentration (BAC) among drivers involved in the crash was .08 grams per deciliter (g/dL) or higher. For fatal crashes occurring from midnight to 3 a.m., 62 percent involved alcohol-impaired driving.

Chapter 2 ■ Crashes

Table 24
Crashes and Crash Rates by Month and Crash Severity

Month	Crash Severity						Total Crashes	
	Fatal		Injury		Property Damage Only			
	Number	Rate*	Number	Rate*	Number	Rate*	Number	Rate*
January	2,275	1.01	136,000	60	334,000	148	472,000	209
February	2,122	0.97	123,000	57	314,000	144	440,000	202
March	2,484	0.98	136,000	54	303,000	120	441,000	175
April	2,429	0.98	121,000	49	295,000	119	418,000	168
May	2,663	1.02	145,000	56	327,000	126	475,000	183
June	2,776	1.07	137,000	53	311,000	120	452,000	174
July	2,821	1.09	132,000	51	301,000	116	436,000	168
August	2,838	1.08	142,000	54	312,000	118	456,000	173
September	2,709	1.14	139,000	58	324,000	136	466,000	196
October	2,628	1.04	147,000	58	368,000	145	518,000	205
November	2,575	1.07	136,000	57	371,000	155	510,000	213
December	2,480	1.04	140,000	59	388,000	163	531,000	223
Total	30,800	1.04	1,634,000	55	3,950,000	133	5,615,000	189

*Crashes per 100 million vehicle miles traveled.

Percent of Fatal Crashes Involving Alcohol-Impaired Driving, by Time of Day and Crash Type

*Highest blood alcohol concentration (BAC) among drivers or motorcycle riders involved in the crash was .08 grams per deciliter (g/dL) or greater.

Chapter 3

VEHICLES

CHAPTER 3 ■ VEHICLES

Statistics about the vehicles involved in police-reported motor vehicle crashes are presented in this chapter, according to six major vehicle types: Passenger Cars, Light Trucks (including pickups, vans, and utility vehicles with a gross vehicle weight rating of 10,000 pounds or less), Large Trucks (including single-unit trucks and truck tractors with a gross vehicle weight rating of more than 10,000 pounds), Motorcycles (including motorcycles, mopeds, and motorscooters), Buses (including school buses and transit buses), and Other Vehicles (including all-terrain vehicles, farm and construction equipment, and motorhomes). The tables and figures are presented for all vehicle types first, then by individual vehicle type. Below are some of the vehicle statistics you will find in this section:

- More than 94 percent of the 9.9 million vehicles involved in motor vehicle crashes in 2012 were passenger cars or light trucks.
- Large trucks accounted for 8 percent of the vehicles in fatal crashes, but only 3 percent of the vehicles involved in injury crashes and 4 percent of the vehicles involved in property-damage-only crashes. Of the 3,802 large trucks involved in fatal crashes, 72 percent were combination trucks.
- The proportion of vehicles that rolled over in fatal crashes (20.3 percent) was more than 4 times as high as the proportion in injury crashes (4.5 percent) and more than 18 times as high as the proportion in property-damage-only crashes (1.1 percent).
- Compared with passenger cars, pickup trucks, vans, large trucks, and buses, utility vehicles experienced the highest rollover rate in fatal crashes (30.6 percent). Large trucks experienced the highest rollover rate in injury crashes (8.0 percent). Large trucks also experienced the highest rollover rate in property-damage-only crashes (1.9 percent).
- Fires occurred in 0.1 percent of the vehicles involved in all traffic crashes in 2012. For fatal crashes, however, fires occurred in 3.3 percent of the vehicles involved.
- Regardless of crash severity, the majority of vehicles in single- and two-vehicle crashes were going straight prior to the crash. The next most common vehicle maneuver differed by crash severity: negotiating a curve for fatal crashes, turning left for injury crashes, and stopped in traffic lane for property-damage-only crashes.
- Motorcycles in fatal crashes had the highest proportion of collisions with fixed objects (24.4 percent), and buses in fatal crashes had the lowest proportion (1.6 percent).

Chapter 3 ■ Vehicles

Chapter 4

PEOPLE

CHAPTER 4 ■ PEOPLE

This chapter presents statistics about the Drivers, Passengers, Pedestrians, and Pedalcyclists involved in police-reported motor vehicle crashes in 2012. The tables and figures are presented in nine groups: all killed or injured persons, crash-involved drivers, occupants (drivers and passengers), alcohol, restraints, motorcycle related, school bus related, pedestrians, and pedalcyclists. Below are some of the statistics you will find in this section:

- A total of 33,561 people lost their lives in motor vehicle crashes in 2012. Another 2.36 million people were injured.
- The majority of persons killed or injured in traffic crashes were drivers (63 percent), followed by passengers (27 percent), motorcyclists (4 percent), pedestrians (3 percent), and pedalcyclists (2 percent).
- Per 100,000 population, persons 21 to 24 years old had the highest fatality rate and the highest injury rate. Children 5 to 9 years old had the lowest fatality rate, and children under 5 years old had the lowest injury rate per 100,000 population.
- For every age group, the fatality rate per 100,000 population was lower for females than for males. The injury rate based on population was higher for females than for males in every age group, except for people under 5 years old, people 5 to 9 years old, and people over 74 years old.
- Of the persons who were killed in traffic crashes in 2012, 31 percent died in alcohol-impaired driving crashes.

Chapter 4 ■ People

Figure 22

Driver Involvement Rates per 100,000 Licensed Drivers, by Age, Sex, and Crash Severity

Table 63

**Drivers and Motorcycle Riders Involved in Fatal Crashes,
by Previous Driving Record and License Type Compliance**

Previous Convictions	Valid License (38,420)		Invalid License (5,784)		Total (44,204)	
	Number	Percent	Number	Percent	Number	Percent
Previous Recorded Crashes	4,436	11.5	604	10.4	5,040	11.4
Previous Recorded Suspensions or Revocations	3,582	9.3	2,708	46.8	6,290	14.2
Previous DWI Convictions	594	1.5	585	10.1	1,179	2.7
Previous Speeding Convictions	6,390	16.6	1,019	17.6	7,409	16.8
Previous Other Harmful Moving Convictions	6,205	16.2	1,501	26.0	7,706	17.4
Drivers with No Previous Convictions	24,169	62.9	2,449	42.3	26,618	60.2

Notes: Table does not include 1,133 drivers with unknown license status. FARS records prior driving records (convictions only, not violations) for events occurring within 3 years of the date of the crash. The same driver can have one or more of these convictions. License type compliance refers to the type of drivers license possessed or not possessed by the driver for the class of vehicle being driven at the time of the crash.

Table 64

Related Factors for Drivers and Motorcycle Riders Involved in Fatal Crashes

Factors	Number	Percent
Driving too fast for conditions or in excess of posted speed limit	9,320	20.6
Under the influence of alcohol, drugs or medication	6,199	13.7
Failure to keep in proper lane or running off road	3,431	7.6
Failure to yield right of way	3,211	7.1
Inattentive (talking, eating, etc.)	3,119	6.9
Overcorrecting/oversteering	2,246	5.0
Operating vehicle in a careless manner	2,052	4.5
Failure to obey traffic signs, signals, or officer	1,820	4.0
Operating vehicle in erratic, reckless, or negligent manner	1,650	3.6
Swerving or avoiding due to wind, slippery surface, vehicle, object, nonmotorist in roadway, etc.	1,557	3.4
Vision obscured (rain, snow, glare, lights, building, trees, etc.)	1,282	2.8
Drowsy, asleep, fatigued, ill, or blackout	1,254	2.8
Driving wrong way on one-way trafficway or on wrong side of road	1,004	2.2
Making improper turn	930	2.1
Other factors	5,238	11.6
None reported	14,150	31.2
Unknown	5,146	11.4
Total Drivers	45,337	100.0

Notes: The sum of the numbers and percentages is greater than total drivers as more than one factor may be present for the same driver.

Erratic, reckless, careless, or negligent operation	3	0.4
Ill, blackout	3	0.4
Traveling on prohibited trafficways	3	0.4
Improper passing	2	0.3
In roadway improperly (standing, lying, working, playing)	2	0.3
Emotional (e.g. depression, angry, disturbed)	1	0.1
Passing with insufficient distance	1	0.1
Portable electronics	1	0.1
Other factors	30	4.1
None reported	158	21.8
Unknown	112	15.4
Total Pedalcyclists	726	100.0

Notes: The sum of the numbers and percentages is greater than total pedalcyclists killed as more than one factor may be present for the same pedalcyclist.

Chapter 5

STATES

CHAPTER 5 ■ STATES

Fatal crash and fatality statistics for each of the 50 States, the District of Columbia, and Puerto Rico are presented in this chapter. Several tables display State fatality rates based on population, licensed drivers, and registered vehicles. The last three tables describe each State's occupant restraint laws, motorcycle helmet laws, and driver's blood alcohol concentration laws. Below are some of the State statistics you will find in this chapter:

- Traffic fatalities increased by 3 percent from 2011 to 2012 for the Nation as a whole. Thirteen States, the District of Columbia, and Puerto Rico showed decreases, ranging from less than 1 percent to as much as 18 percent.
- The pedestrian fatality rate per 100,000 population was 1.51 for the Nation. Delaware had the highest rate (2.94), and South Dakota, with two pedestrian fatalities, had the lowest rate (0.24).
- About 2.2 percent of all traffic crash fatalities in 2012 were pedalcyclists. The District of Columbia, Nebraska, New Hampshire, North Dakota, South Dakota, Vermont, and Wyoming reported no pedalcyclists killed.
- In 2012, all 50 States, the District of Columbia, and Puerto Rico had seat belt use laws. All 50 States, the District of Columbia, and Puerto Rico also had laws requiring children of certain ages to be restrained in child safety seats.
- Motorcycle helmets were required for all riders in 19 States, the District of Columbia, and Puerto Rico in 2012. Twenty-eight States had helmet requirements with exceptions (age, rider type, roadway type), and three States (Illinois, Iowa, and New Hampshire) did not require helmets at all.
- In 2012, it was a criminal offense to operate a motor vehicle at a blood alcohol concentration (BAC) of .08 g/dL or above in all 50 States, the District of Columbia, and Puerto Rico.

Chapter 5 ■ States

Table 126

Key Provisions of Occupant Restraint Laws and Seat Belt Use Rates in 2012

State	Enforcement Type	Base Fine ⁽¹⁾	Seat Belt Required		Exemptions	2012 Observed Seat Belt Use Rate	Child Restraint (CR) Required	Base Fine	Additional Information
			Seats ⁽²⁾	Ages ⁽³⁾					
AL	Primary	Not more than \$25	Front	All	Medical reasons, model year <1965, rural mail carriers/newspaper delivery vehicles, vehicles operating in reverse.	89.5%	<1 year or <20 lbs in rear-facing infant seat; 1-4 or 20-40 lbs in forward-facing CR; 5 years old (but not yet 6) in booster seat.	\$25	See AL Statutes 32-5B and 32-5-222.
AK	Primary	Not more than \$15	All	16 years and older	School buses, emergency vehicles, mail or newspaper delivery vehicles, vehicles not equipped with seat belts, non-highway vehicles (generally, off-road or snowmobiles).	88.1%	3 years and under in CR; 4-8 years, 20-65 lbs, and <57 inches tall in booster seat.	\$50	See AK Statute 28.05.095.
AZ	Secondary	Not more than \$10	All Front	8-15 years 8 years and older	Designed for >10 passengers, model year <1972, rural mail carriers, medical reasons.	82.2%	<5 years, children 5-8 years and not more than 57 inches tall must be restrained in a CR.	\$50	See AZ Statutes 28-907 and 28-909.
AR	Primary	Not more than \$25	Front	All	Model year <1972. Not required when an emergency exists that threatens the life of a child or person operating a motor vehicle. Any child who is physically unable because of a medical condition (as certified by a physician) is exempted.	71.9%	5 years and under and <60 lbs; children 60 lbs or more may be in a seat belt.	\$100	See AR Statutes 27-37-706 and 27-34-103.
CA	Primary	Not more than \$20	All	16 years and older	Medical reasons, emergency vehicles, rural postal service vehicles, newspaper delivery vehicles, recycling vehicles, taxis.	95.5%	<8 years in rear seat.	\$100	See CA Vehicle Code Statutes 27315 and 27360.
CO	Secondary	\$65	Front	All	Ambulance crew, peace officer, medical reasons, passenger buses, school buses, postal service vehicles, delivery and pickup service vehicles.	80.7%	<1 year and <20 lbs in rear-facing CR; 1-3 and 20-40 lbs in forward-facing CR; 4-5 and <55 inches in booster seat. Seat belt allowed for 8-15 or >55 inches tall.	\$82	See CO Statutes 42-4-237-7 and 42-4-1701.
CT	Primary	\$50 ⁽⁴⁾	Front	All	Medical reasons, emergency vehicles other than fire-fighting apparatus, postal service vehicles, newspaper delivery vehicles.	86.8%	<1 year or <20 lbs in rear-facing CR; 1-6 and <60 lbs in CR; booster seat only in seating position with lap and shoulder belt; 7-15 years and >60 lbs, seat belt permissible.	\$60	See CT Statute 14-100a.

⁽¹⁾Additional processing and surcharge fees are likely to apply.

⁽²⁾The word "All" used in this category means everyone must be restrained. For children, that may be in a CR.

⁽³⁾May include rear-facing CRs, forward-facing CRs, and booster seats.

⁽⁴⁾If a driver under 18 years old commits a violation, he/she is subject to a higher fine of \$75.

			Seats ⁽²⁾	Ages ⁽³⁾					
MD	Primary	Not more than \$25	All Front	15 years and under 16 years and older	"Historical" vehicles, for-hire vehicles, motorcycles, trucks, buses, postal vehicles, vehicles built before June 1, 1964.	91.1%	<8 years in appropriate CR unless 57 inches or taller or >65 lbs.	\$25	See MD Statutes 22-412.2 and 22.412.3.
MA	Secondary	\$25 ⁽⁸⁾	All	All	Buses, trucks 18,000 lbs or more, taxis, utility vehicles, model year <1966, postal vehicles, farm vehicles, authorized emergency vehicles, side-facing seat in car owned for antique collecting.	72.7%	7 years and under and <57 inches tall; seat belts permissible for children 8-12 years or >57 inches tall.	\$25	See MA Title XIV, 90 MGL Section 13A and 90 MGL Section 7AA.
MI	Primary	\$25	Front	All	Medical reasons, taxis, buses, school buses, postal service vehicles, model year <1965, commercial vehicles making frequent stops.	93.6%	7 years and under and <57 inches tall; <4 years must be in CR in back seat; seat belt permissible for children 8-15 years or >57 inches tall.	\$10 ⁽⁹⁾	See MI Statute 257.710e and 257.710d.
MN	Primary	\$25	All	All	Farm pickup trucks, postal vehicles, commercial vehicles making frequent stops and going <25 mph between stops, vehicles driving in reverse, persons riding in a vehicle in which all the seating positions equipped with seat belts are occupied by other persons in seat belts, model year <1965, medical reasons.	93.6%	7 years and under and <57 inches tall; seat belts permissible for children >8 years old or >57 inches tall.	\$50	See MN Statutes 169.685 and 169.686.
MS	Primary	\$25	Front	All	Vehicles driving in reverse, farm vehicles, medical reasons, buses, postal vehicles, utility meter readers' vehicles, all-terrain vehicles, vehicles designed to carry >15 persons, trailers.	83.2%	3 years and under in CR; 4-6 years and <57 inches tall or <65 lbs in booster seat; seat belts permissible for children >7 years old, >57 inches tall, or >65 lbs.	\$25	See MS Statute 63-2- and 63-7-301.
MO	Secondary (primary for <16 years old)	Not more than \$10 ⁽¹⁰⁾	Front	All	Vehicles designed for >10 people, trucks >12,000 lbs, postal service vehicles, vehicles requiring frequent entry or exit, agricultural vehicles.	79.4%	<4 years old or <40 lbs in car seat; 4-7 and 40-80 lbs and <57 inches tall in booster seat. If all safety restraints are in use, persons <16 years old must be in rear seat.	\$50; \$10 for >80 lbs or >57 inches tall	Persons <18 years operating or riding in a truck are required to wear seat belts. See MO Statutes 307.178 and 307.179.1.

⁽⁸⁾Drivers in Massachusetts may be fined \$25 for violating the belt law themselves and \$25 for each unrestrained passenger 12 to 16 years old.

⁽⁹⁾The fine is \$10 for children <4 years old or \$25 for children 4 to 8 years old and >57 inches tall.

⁽¹⁰⁾The fine is \$50 for violators 8 to 15 years old.

Table 126

Key Provisions of Occupant Restraint Laws and Seat Belt Use Rates in 2012 (Continued)

State	Enforcement Type	Base Fine ⁽¹⁾	Seat Belt Required		Exemptions	2012 Observed Seat Belt Use Rate	Child Restraint (CR) Required	Base Fine	Additional Information
			Seats ⁽²⁾	Ages ⁽³⁾					
MT	Secondary	\$20	All	All	Medical reasons, motorcycles, vehicles making frequent stops, occupants of motor vehicle in which all seat belts are being used by other occupants.	76.3%	<6 years and <60 lbs	\$100	See MT Statutes 61-13-103 and 61-9-420.
NE	Secondary	\$25	All	16 years and under	Taxis, mopeds, motorcycles, emergency vehicles, model year <1963, parade vehicles.	78.6%	5 years and under; seat belts permissible for children 6-17 years old.	\$25	See NE Statutes 60-6, 267 and 606-6, 268.
			Front	18 years and older					
NV	Secondary	Not more than \$25	All	All	Medical reasons, public transportation vehicles, postal service vehicles, emergency vehicles, delivery vehicles not exceeding 15 mph. Any vehicle or seating position if the State determines compliance is impractical.	90.5%	6 years or under and <60 lbs.	\$100-\$500	See NV Statute 484D.495.
NH	No law for persons 18 years or older (primary for <18 years old).	\$50 for persons <18 years old	All	17 years and younger	—	68.6%	5 years and under and <55 inches tall; seat belts permissible for children 6-17 years old or <6 years and >55 inches tall.	\$50	See NH Statute 265:107-a.
NJ	Primary (secondary for rear seat occupants)	\$20	All	All	Vehicles manufactured before 1966, medical reasons, rural letter carriers, fewer belts than seats.	88.3%	<8 years and <55 inches tall; in rear seat if available.	\$25	See NJ Statute 39:3-76.2.
NM	Primary	\$25	All	All	Vehicles >10,000 lbs, medical reasons, rural letter carriers.	91.4%	<1 year in rear-facing CR, in rear seat if available; 1-4 or <40 lbs in CR; 5-6 or <60 lbs in booster seat.	\$25	See NM Statutes 66-7-369 and 66-7-362.
NY	Primary	Not more than \$50	All	15 years and under	Buses, school buses, taxis, liveries, emergency vehicles, rural letter carriers.	90.4%	<3 years unless >40 lbs and no lap/shoulder belt available; 4-7 years unless no lap/shoulder belt available.	\$100	See NY Statute 1229-c.
			Front	All					
NC	Primary (secondary for rear seat occupants)	\$25.50 (\$10 for rear seat)	All	All	Medical reasons, farm vehicles, postal vehicles, designated commercial vehicles, delivery vehicles traveling <20 mph, trash/recycling trucks.	87.5%	7 years and under and <80 lbs; seat belts permissible for 8-15 years or 40-80 lbs in seats without shoulder belts.	\$25	See NC Statutes 20-135.2A and 20-137.1C.
ND	Secondary	Not more than \$20	All	17 years and under	Designed for >10 people, farm vehicles, rural mail carriers, medical reasons, all front seat belts in use by other occupants.	80.9%	6 years and under and <57 inches tall or <80 lbs.	\$25	See ND Statutes 39.21-41.1-2.
			Front	All

Key Provisions of Occupant Restraint Laws and Seat Belt Use Rates in 2012 (Continued)

State	Enforcement Type	Base Fine ⁽¹⁾	Seat Belt Required		Exemptions	2012 Observed Seat Belt Use Rate	Child Restraint (CR) Required	Base Fine	Additional Information
			Seats ⁽²⁾	Ages ⁽³⁾					
OH	Secondary	\$30 driver \$20 passenger	All Front	8-14 years 15 years and older	Postal service vehicles, medical reasons, vehicles delivering newspapers.	82.0%	4 years and under or <40 lbs in CR; 4-8 years and <57 inches in booster seat; seat belts permissible for children 8-14 years.	\$75 ⁽¹¹⁾	See OH Statute 4513.263.
OK	Primary	Not more than \$20	All Front	All 12 years and older	Farm vehicles, RVs, motorcycles, motorized bicycles, postal service vehicles, school buses, taxicabs, emergency vehicles.	83.8%	5 years and under.	\$50	See OK Statute 47-12-417.
OR	Primary	Not more than \$250	All	All	Vehicles in interstate commerce, designed for >15 passengers, newspaper and mail vehicles, meter and transit vehicles, for-hire vehicles, trash trucks, emergency vehicles, taxicab operators.	96.8%	<1 year or <20 lbs in rear-facing car seat; <40 lbs in CR; >40 lbs and <57 inches or <8 years in safety system that elevates the child so that an adult seat belts fits properly.	Not more than \$250	See OR Statutes 811.210 to 811.225.
PA	Secondary	\$10	All Front	8-17 years 18 years and older	Vehicles manufactured before 1966, medical reasons, trucks >7,000 lbs, rural letter carriers, delivery vehicles, vehicles traveling <15 mph.	83.5%	7 years and under.	\$75	See PA Statute 75.4581.
RI	Primary ⁽¹²⁾	\$85	All	All	Vehicles manufactured before 1966, medical reasons, postal service vehicles.	77.5%	7 years and under and <80 lbs and <54 inches tall in rear seat if available.	\$75	See RI Statute 32.22-22.
SC	Primary	Not more than \$25	All	All	Medical reasons, emergency vehicles, postal service vehicles, delivery vehicles, parade vehicles; school, church, or day care buses; public transportation vehicles except taxis, vehicles in which all seating positions with seat belts are already occupied, persons occupying vehicles not originally equipped with seat belts.	90.5%	<1 year or <20 lbs in rear-facing CR; 1-5 and 20-39 lbs in forward-facing CR; 1-5 and 40-80 lbs in booster seat secured by lap/shoulder belt (lap belt alone is not permissible); <5 years in rear seat if available.	\$150	See SC Statutes 56-5-6520 and 56-5-6410.
SD	Secondary	\$25	All Front	17 years and under 18 years and older	Motorcycles, motorized bicycles, vehicles manufactured before 1973, medical reasons, passenger buses, school buses, farm vehicles, rural mail carriers, newspaper or periodical delivery vehicles.	66.5%	<5 years and <40 lbs.	\$25	See SD Statute 32.38.

⁽¹¹⁾In Ohio, the law is secondary for children 4 to 14 years old.

⁽¹²⁾Rhode Island's primary seat belt law included a sunset provision that reverted the law to secondary enforcement on June 30, 2013.

Chapter 5 ■ States

Table 126

Key Provisions of Occupant Restraint Laws and Seat Belt Use Rates in 2012 (Continued)

State	Enforcement Type	Base Fine ⁽¹⁾	Seat Belt Required		Exemptions	2012 Observed Seat Belt Use Rate	Child Restraint (CR) Required	Base Fine	Additional Information
			Seats ⁽²⁾	Ages ⁽³⁾					
TN	Primary	Not more than \$50 ⁽¹³⁾	All	All	Vehicles >8,500 lbs, rural letter carriers, utility workers, newspaper delivery vehicles, automobile salespersons who drive <50 miles per day on average, parade vehicles, hayrides crossing a highway from one field to another if operated at <15 mph.	83.7%	<1 year or 20 lbs or less in rear-facing CR; 1-3 and >20 lbs in forward-facing CR; 4-8 and <57 inches tall in booster seat; <8 and <57 inches in rear seat if available.	\$50	See TN Statutes 55-9-602 and 55-9-603.
TX	Primary	\$50	All	All	Farm vehicles <48,000 lbs, postal service vehicles, newspaper delivery vehicles, meter readers.	94.0%	7 years and under unless >57 inches tall.	\$25-\$250	See TX Statute Sec. 545.412.
UT	Secondary (primary for drivers and occupants 18 years and younger)	Not more than \$45	All	All	Vehicles manufactured before 1966, medical reasons, all seats occupied or person is riding in a seating position not equipped with seat belts.	81.9%	7 years or under and <57 inches tall; seat belt permissible for 8-15 years old or >57 inches tall.	\$45	See UT Statute 41-6a-1803.
VT	Secondary (primary for drivers and occupants 17 years and younger)	\$25	All	All	Buses, taxis, rural mail carriers, delivery vehicles traveling <15 mph, emergency vehicles, farm tractors, vehicles ordered by emergency personnel to evacuate persons from stricken area.	84.2%	<1 year or <20 lbs in rear-facing CR; 2-7 years and >20 lbs in rear seat unless front passenger airbag is deactivated; seat belts permissible for 8-15 years old and >20 lbs.	\$25	See VT Statutes 23-1258 – 23-1259.
VA	Secondary (primary for passengers 17 years and younger in all seats)	\$25	All Front	17 years and under 18 years and older	Medical reasons, trucks >10,000 lbs, school buses, motor homes, taxis, police vehicles enforcing parking or transporting prisoners, law enforcement officers when seat belts are impractical, rural mail carriers, newspaper delivery vehicles, utility meter readers, commercial vehicles making frequent stops.	78.4%	7 years and under; rear-facing devices in rear seat if available; if not, in front seat, only if front passenger airbag is deactivated.	\$50	See VA Statutes 46.2-1094 and 46.2-1098.
WA	Primary	\$124	All	All	Medical reasons, vehicles designed for >10 people, when all designated seating positions are occupied; vehicles exempted by State regulation, including farm construction or commercial vehicles making frequent stops.	96.9%	8 years and under and <57 inches tall; 13 years and under in rear seat if practical.	\$124	See WA Statutes 46.63.110 and 46.61.688.

⁽¹³⁾In lieu of a court appearance, a first offender may pay a fine of \$10; for a second or subsequent offense, the fine is \$20.

Table 126

Key Provisions of Occupant Restraint Laws and Seat Belt Use Rates in 2012 (Continued)

State	Enforcement Type	Base Fine ⁽¹⁾	Seat Belt Required		Exemptions	2012 Observed Seat Belt Use Rate	Child Restraint (CR) Required	Base Fine	Additional Information
			Seats ⁽²⁾	Ages ⁽³⁾					
WV	Secondary ⁽¹⁴⁾	Not more than \$25	All Front	8-17 years All	Motorcycles, vehicles designed for >10 people, vehicles manufactured before 1967, medical reasons, rural mail carriers, trailers. All seat belts in use and vehicle contains more passengers than total number of seat belts or other safety devices installed in compliance with Federal motor vehicle safety standards.	84.0%	7 years and under and <57 inches tall.	\$20	See WV Statutes 17C-15-46 and 17C-15-49.
WI	Primary	\$10	All	All	Emergency vehicles in which compliance could endanger passengers; taxis, farm trucks engaged in farming, rural mail carriers, land surveyors.	79.9%	<1 year or <20 lbs in rear-facing CR; 1-3 and 20-40 lbs in forward-facing CR, in rear seat if available; 4-7 and 40-80 lbs in booster seat.	\$10-\$75 ⁽¹⁵⁾	See WI Statute 347.48.
WY	Secondary	Not more than \$25 ⁽¹⁶⁾	All	All	Medical reasons, postal vehicles; excess passengers exempted if all seats occupied.	77.0%	8 years and younger in rear seat if available.	\$50 maximum	See WY Statute 31-5-1401.

⁽¹⁴⁾Upgraded to primary enforcement on May 23, 2013, effective July 9, 2013.

⁽¹⁴⁾Penalty not less than \$30 or more than \$75 for violation involving child <4 years and not less than \$10 or more than \$25 for child 4 to 8 years.

⁽¹⁵⁾Not less than \$10 for passenger or more than \$25 for driver.

Table 127
History of State Motorcycle Helmet Laws

State	Effective Date of Original Law*	Effective Date of Repeal/Amendment	
AL	11/06/67		
AK	01/01/71	06/23/76	Repealed for operators 18 and older.
AZ	01/01/69	05/27/76	Repealed for 18 and older.
AR	06/29/67	07/31/97	Repealed for 21 and older.
CA	01/01/85**	01/01/92	Reinstated for all.
CO	07/01/69	05/20/77	Repealed.
		07/01/07	Reinstated for under 18.
CT	10/01/67	06/01/76	Repealed.
		01/01/90	Reinstated for under 18.
DE	06/21/68	06/10/78	Repealed for 19 and older. All riders must have helmet in their possession.
		07/17/84	Helmet required for instruction permit holders.
DC	02/11/70		
FL	09/13/67	07/01/00	Repealed for 21 and older if covered by insurance of at least \$10,000 in medical benefits.
GA	07/01/69		
HI	06/04/67	06/07/77	Repealed for 18 and older.
ID	01/01/68	03/29/78	Repealed for 18 and older.
IL	07/01/69	07/01/70	No helmet law for any motorcyclists since 1970 repeal.
IN	07/26/67	09/01/77	Repealed.
		01/01/84	Reinstated for under 18.
IA	09/01/75	07/01/76	No helmet law for any motorcyclists since 1976 repeal.
KS	07/01/67	07/01/70	Repealed for 21 and older.
		07/01/72	Reinstated for all.
		07/01/76	Repealed for 16 and older.
		07/01/79	Reinstated for 16 and 17.
KY	06/13/68	07/15/98	Repealed for 21 and older provided operator has held motorcycle license for 1 year and has provided proof of health insurance when registering motorcycle.
		07/04/00	Health insurance requirement repealed.
LA	07/31/68	10/01/76	Repealed for 18 and older.
		01/01/82	Reinstated for all.
		08/15/99	Repealed for age 18 and over if covered by insurance of at least \$10,000 in medical benefits.
		08/15/04	Reinstated for all.
ME	10/07/67	10/24/77	Repealed.
		07/03/80	Reinstated for under 15.
		09/23/83	Required for holders of instruction permits, for licensees holding license for 1 year or less, and for passengers if required for operator.
		09/01/09	Reinstated for 16 and 17, instruction permit holders, operators licensed for less than 1 year, and passengers (regardless of age) if required for operator.
MD	07/01/68	07/01/79	Repealed for 18 and older.
		10/01/92	Reinstated for all.
MA	05/22/67		
MI	03/10/67	06/12/68	All riders required to have helmet in their possession.
		07/29/69	Reinstated for all.
		04/13/12	Repealed for 21 and older with at least \$20,000 medical insurance coverage and motorcycle endorsement on driver's license for at least 2 years, or passed a motorcycle safety course, and for 19 and older operating a moped on a public thoroughfare.
MN	05/01/68	04/06/77	Repealed for 18 and older. Helmet required for holders of instruction permits.
MS	03/28/74		
MO	09/28/67		
MT	07/01/73	07/01/77	Repealed for 18 and older.
NE	05/29/67	09/02/77	Repealed (law was never enforced).
		01/01/89	Reinstated for all.
NV	01/01/72		
NH	09/05/67	08/07/77	Repealed for 18 and older until Federal law ceases to require a motorcycle helmet law as a condition for receipt of Federal funds.
		09/30/95	Repealed for all when Federal law requiring helmet laws for Federal funds was voided.

*Original law applied to all motorcyclists, unless otherwise noted.

**Applied only to riders under 15½.

Table 127
History of State Motorcycle Helmet Laws (Continued)

State	Effective Date of Original Law*	Effective Date of Repeal/Amendment	
NJ	01/01/68		
NM	06/16/67	03/31/77	Repealed for 18 and older.
NY	01/01/67		
NC	01/01/68		
ND	07/01/67	07/01/77	Repealed except for operators under 18 and passengers, regardless of age, if required for operator.
OH	01/01/68	07/10/78	Repealed except for riders under 18; operators having motorcycle license less than 1 year; and passengers if required for operator.
OK	04/27/67	04/01/69 11/01/75 05/21/76	Repealed for 21 and older. Reinstated for all. Repealed for 18 and older.
OR	01/01/68	10/04/77 06/16/88	Repealed for 18 and older. Reinstated for all (by voter referendum).
PA	07/15/68	09/04/03	Repealed for operator 21 and older if operator has held motorcycle license for at least 2 years or has completed rider education. Repealed for passenger 21 and older if operator is exempt.
RI	04/04/67	05/21/76 07/01/92	Repealed for all operators. Required for all passengers. Required for operators under 21, operators licensed for 1 year or less, and all passengers.
SC	07/01/67	06/16/80	Repealed for 21 and older.
SD	07/01/67	07/01/77	Repealed for 18 and older.
TN	06/04/67		
TX	01/01/68	08/29/77 09/01/89 09/01/97	Repealed for 18 and older. Reinstated for all. Repealed for 21 and older who have completed rider education or are covered by insurance of at least \$10,000 in medical benefits.
UT	05/13/69	05/10/77	Repealed for 18 and older. Required for 17 and under on roads posted for speeds higher than 35 mph.
VT	03/06/68		
VA	06/26/70		
WA	06/08/67	09/21/77 07/26/87 06/07/90	Repealed. Reinstated for under 18. Reinstated for all.
WV	05/25/71		
WI	07/01/68	03/19/78	Repealed except for under 18 and instruction permit holders.
WY	05/24/73	05/27/83 07/01/93	Repealed for 19 and older. Repealed for 18 and older.

Nonmotorist Action/Circumstances at Time of Crash	Police-Reported Drug Involvement
Nonmotorist Action/Circumstances Prior to Crash	Sex
Nonmotorist Location at Time of Crash	Taken to Hospital or Treatment Facility

APPENDIX C ■ GES TECHNICAL NOTES

Standard Errors

The national estimates produced from GES data may differ from the true values, because they are based on a probability sample of crashes and not a census of all crashes. The size of these differences may vary depending on which sample of crashes was selected. [For a complete description of the GES sampling design, see *National Accident Sampling System General Estimates System Technical Note* (DOT HS 807 796) available from NCSA.] The standard error of an estimate is a measure of the precision or reliability with which an estimate from this particular GES sample approximates the results of a census.

In a report of this size, it is impractical to provide standard errors for each estimate. Instead, generalized standard errors for estimates of totals are provided in the following table. Generalized errors were calculated separately for the crash, vehicle, and people characteristics. The values for the GES estimates and an estimate of one standard error are given in Table C1 on the following page. By adding and subtracting two standard errors, a 95 percent confidence interval can be created for the GES estimates in this report. For example, the estimated number of injury crashes that occurred in the month of March is given in Table 24 as 136,000. To calculate one standard error for this crash estimate, use Table C1. Since 136,000 does not appear in the Crash Estimate column of Table C1, use linear interpolation from the standard error values for 100,000 (8,100) and 200,000 (15,200). One standard error would be approximately 10,700. The 95 percent confidence interval for this estimate would be $136,000 \pm 2 \times 10,700$ or 114,600 to 157,400.

Appendix C ■ GES Technical Notes

Table C1
2012 GES Estimates and Standard Errors

Crash Estimate (x)	Crash Standard Error (SE) *	Vehicle Estimate (x)	Vehicle Standard Error (SE) **	Person Estimate (x)	Person Standard Error (SE) ***
1,000	300	1,000	400	1,000	400
5,000	800	5,000	1,000	5,000	900

Appendix C ■ GES Technical Notes

Unknowns

GES data are obtained either directly from an item on the PAR or by interpreting the information provided in the report through reviewing the crash diagram, the Officer's written summary of the crash, or combinations of variables on the PAR. Because of this interpretation, and because the police officer may not have entered some item of information or provided complete information, data can be missing. Prior to 2010 data, two different statistical procedures were used on GES data to complete values for unknown data. These procedures, univariate and hotdeck imputation, are described in a technical report available from NCSA, *Imputation in the General Estimates System* (DOT HS 807 985). Imputation by sequential regression was instituted in 2010, using a software package called IVEware that was developed at the University of Michigan. In this method, covariates are selected automatically using stepwise regression. Because it can be done in an automated fashion, this method replaced both univariate and hotdeck imputation in 2010. The only exception was body type, which was imputed in a univariate method. Table C2 below gives the reader the proportions of unknown values prior to imputation for variables with imputed values that were used in this report.

Table C2
Percent of Unknowns for 2012 GES Data Elements

Crash Level			
Atmospheric Condition	1.4%	Light Condition	0.7%
Crash Severity	3.0%	Manner of Collision	0.3%
Day of Week	0.0%	Minute of Crash	0.6%
First Harmful Event	0.1%	Relation to Junction	0.5%
Hour of Crash	0.6%	Relation to Trafficway	0.1%
Vehicle/Driver Level			
Initial Point of Impact	1.9%	Speed Limit*	14.7%
Most Harmful Event	0.4%	Traffic Control Device*	3.3%
Roadway Surface Condition*	0.9%	Vehicle Type	1.5%
Vehicle/Driver Level			
Age	9.3%	Seating Position	2.0%
Injury Severity	4.6%	Sex	4.9%

*Roadway Surface Condition, Speed Limit, and Traffic Control Device elements were moved from the Crash level to the Vehicle level in 2010.

Note: For some data elements, counts for the GES category "Not Reported On" were combined with counts for "Unknown" in the frequencies above.

Alcohol Involvement

NHTSA defines a fatal crash as alcohol-related or alcohol-involved if at least one driver or nonoccupant (such as a pedestrian or pedalcyclist) involved in the crash is determined to have had a Blood Alcohol Concentration (BAC) of .01 gram per deciliter (g/dL) or higher. Thus, any fatality that occurs in an alcohol-related crash is considered an alcohol-related fatality.

NHTSA defines a nonfatal crash as alcohol-related or alcohol-involved if police indicate on the police accident report that there is evidence of alcohol present. The code does not necessarily mean that a driver or nonoccupant was tested for alcohol.

The term “alcohol-related” or “alcohol-involved” does not indicate that a crash or fatality was caused by the presence of alcohol.

Alcohol-Impaired Driving Crashes

Crashes that involve at least one driver or motorcycle rider (operator) with a BAC of .08 g/dL or higher. Thus, any crash involving a driver or motorcycle rider with a BAC of .08 g/dL or higher is considered to be an alcohol-impaired driving crash.

Alcohol-Impaired Driving Fatalities

Fatalities in crashes that involve at least one driver or motorcycle rider (operator) with a BAC of .08 g/dL or higher. Thus, any fatality occurring in a crash involving a driver or motorcycle rider with a BAC of .08 g/dL or higher is considered to be an alcohol-impaired driving fatality.

Blood Alcohol Concentration

The BAC is measured as a percentage by weight of alcohol in the blood (g/dL). A positive BAC level (.01 g/dL and higher) indicates that alcohol was consumed by the person tested; a BAC level of .08 g/dL or more indicates that the person was alcohol-impaired.

Body Type

Detailed type of motor vehicle within a vehicle type.

Bus

Any motor vehicle designed primarily to transport large groups of passengers (nine or more persons, including the driver). Includes school buses, inter-city buses, and transit buses.

Combination Truck

A truck tractor not pulling a trailer; a tractor pulling at least one full or semi-trailer; or a single-unit truck pulling at least one trailer.

Crash

An event that produces injury and/or property damage, involves a motor vehicle in transport, and occurs on a trafficway or while the vehicle is still in motion after running off the trafficway.

Crash Severity

1. **Fatal Crash.** A police-reported crash involving a motor vehicle in transport on a trafficway in which at least one person dies within 30 days of the crash.
2. **Injury Crash.** A police-reported crash that involves a motor vehicle in transport on a trafficway in which no one died but at least one person was reported to have: (1) an incapacitating injury; (2) a visible but not incapacitating injury; (3) a possible, not visible injury; or (4) an injury of unknown severity.
3. **Property-Damage-Only Crash.** A police-reported crash involving a motor vehicle in transport on a trafficway in which no one involved in the crash suffered any injuries.

Crash Type

Single-vehicle or multiple-vehicle crash.

Day

From 6 a.m. to 5:59 p.m.

Driver

An occupant of a vehicle who is in physical control of a motor vehicle in transport, or for an out-of-control vehicle, an occupant who was in control until control was lost.

Ejection

Refers to occupants being totally or partially thrown from the vehicle as a result of an impact or rollover.

First Harmful Event

The first event during a crash that caused injury or property damage.

Glossary

Fixed Object

Stationary structures or substantial vegetation attached to the terrain.

Gross Vehicle Weight Rating (GVWR)

The maximum rated capacity of a vehicle, including the weight of the base vehicle, all added equipment, driver and passengers, and all cargo loaded into or on the vehicle. Actual weight may be less than or greater than GVWR.

Initial Impact Point

The first impact point that produced personal injury or property damage, regardless of First or Most Harmful Event.

Injury Severity

The police-reported injury severity of the person (i.e., occupant, pedestrian, or pedalcyclist).

1. Killed (Fatal)
2. Injured (Incapacitating injury, evident injury but not incapacitating, complaint of injury, or injured, severity unknown).
3. No injury.

Jackknife

Jackknife can occur at any time during the crash sequence. In this report, jackknifing is restricted to truck tractors pulling a trailing unit in which the trailing unit and the pulling vehicle rotate with respect to each other.

Junction

Area formed by the connection of two roadways, including intersections, interchange areas, and entrance/exit ramps.

Land Use

The crash location (urban or rural).

Large Trucks

Trucks over 10,000 pounds gross vehicle weight rating, including single unit trucks and truck tractors.

Light Trucks

Trucks of 10,000 pounds gross vehicle weight rating or less, including pickups, vans, truck-based station wagons, and utility vehicles.

Manner of Collision

A classification for crashes in which the first harmful event was a collision between two motor vehicles in transport and is described as one of the following:

Angle. Collisions which are not head-on, rear-end, rear-to-rear, or sideswipe.

Head-on. Refers to a collision where the front end of one vehicle collides with the front-end of another vehicle while the two vehicles are traveling in opposite directions.

Rear-end. A collision in which one vehicle collides with the rear of another vehicle.

Sideswipe. A collision in which the sides of both vehicles sustain minimal engagements.

Most Harmful Event

The event during a crash for a particular vehicle that is judged to have produced the greatest personal injury or property damage.

Motor Vehicle in Transport

A motor vehicle in motion on the trafficway or any other motor vehicle on the roadway, including stalled, disabled, or abandoned vehicles.

Motorcycle

A two- or three-wheeled motor vehicle designed to transport one or two people, including motor-scooters, minibikes, and mopeds.

Motorcycle Rider

The operator (driver) of a motorcycle.

Motorcyclist

Any person riding on a motorcycle, including the motorcycle rider (operator) and any passenger (a person riding on, but not in control of, the motorcycle).

Night

From 6 p.m. to 5:59 a.m.

Noncollision

A class of crash in which the first harmful event does not involve a collision with a fixed object, nonfixed object, or a motor vehicle. This includes overturn, fire/explosion, falls from a vehicle, and injuries in a vehicle.

Nonoccupant

Any person who is not an occupant of a motor vehicle in transport and includes the following:

1. Pedestrians
2. Pedalcyclists
3. Occupants of parked motor vehicles
4. Others such as joggers, skateboard riders, people riding on animals, and persons riding in animal-drawn conveyances.

Nonoccupant Location

The location of nonoccupants at time of impact. Intersection locations are coded only if nonoccupants were struck in the area formed by a junction of two or more trafficways. Non-intersection location may include nonoccupants struck on a junction of a driveway/alley access and a named trafficway. Nonoccupants who are occupants of motor vehicles not in transport are coded with respect to the location of the vehicle.

Objects Not Fixed

Objects that are movable or moving but are not motor vehicles. Includes pedestrians, pedalcyclists, animals, or trains (e.g., spilled cargo in roadway).

Occupant

Any person who is in or upon a motor vehicle in transport. Includes the driver, passengers, and persons riding on the exterior of a motor vehicle.

Other Vehicle

Consists of the following types of vehicles:

1. Large limousine (more than four side doors or stretched chassis)
2. Three-wheel automobile or automobile derivative
3. Van-based motorhome
4. Light-truck-based motorhome (chassis mounted)
5. Large-truck-based motorhome
6. ATV (all terrain vehicle, including dune/swamp buggy) and ATC (all terrain cycle)
7. Snowmobile
8. Farm equipment other than trucks
9. Construction equipment other than trucks (includes graders)
10. Other type vehicle (includes go-cart, fork lift, city streetsweeper).

Passenger

Any occupant of a motor vehicle who is not a driver.

Passenger Car

Motor vehicles used primarily for carrying passengers, including convertibles, sedans, and station wagons.

Pedalcyclist

A person on a vehicle that is powered solely by pedals.

Pedestrian

Any person not in or upon a motor vehicle or other vehicle.

Restraint Use

The occupant's use of available vehicle restraints, including lap belt, shoulder belt, or automatic belt.

Roadway

That part of a trafficway designed, improved, and ordinarily used for motor vehicle travel.

Roadway Function Class

The classification describing the character of service the street or highway is intended to provide. Includes the following:

Interstates. Limited access divided facilities of at least four lanes designated by the Federal Highway Administration as part of the Interstate System.

Other Freeways and Expressways. All urban principal arterial with limited control of access not on the Interstate system.

Other Principal Arterials. Major streets or highways, many with multi-lane or freeway design, serving high-volume traffic corridor movements that connect major generators of travel.

Minor Arterials. Streets and highways linking cities and larger towns in rural areas in distributing trips to small geographic areas in urban areas (not penetrating identifiable neighborhoods).

Collectors. In rural areas, routes serving intra-county, rather than State-wide travel. In urban areas, streets providing direct access to neighborhoods as well as direct access to arterials.

Local Streets and Roads. Streets whose primary purpose is feeding higher order systems, providing direct access with little or no through traffic.

Glossary

Rollover

Rollover is defined as any vehicle rotation of 90 degrees or more about any true longitudinal or lateral axis. Includes rollovers occurring as a first harmful event or subsequent event.

Seating Position

The location of the occupants in the vehicle. More than one can be assigned the same seat position; however, this is allowed only when a person is sitting on someone's lap.

School Bus Related Crash

Any crash in which a vehicle, regardless of body design, used as a school bus is directly or indirectly involved, such as a crash involving school children alighting from a vehicle.

Single-Unit Truck

A medium or heavy truck in which the engine, cab, drive train, and cargo area are all on one chassis.

Trafficway

Any road, street, or highway open to the public as a matter of right or custom for moving persons or property from one place to another.

Vehicle

See *Motor Vehicle in Transport*.

Vehicle Type

A series of motor vehicle body types that have been grouped together because of their design similarities. The principal vehicle types used in this report are passenger car, light truck, large truck, motorcycle, bus, and other vehicle. See the definition of each of the vehicle types elsewhere in this glossary.

Weekday

From 6 a.m. Monday to 5:59 p.m. Friday.

Weekend

From 6 p.m. Friday to 5:59 a.m. Monday.

*Estimated reductions in deaths that resulted from the presence of laws establishing a minimum legal age of 21 years for the consumption of alcoholic beverages.

The table above presents estimates of the lives saved in 2012 and previous years by various protective devices or laws. The estimates were obtained by combining information from fatal traffic crashes with estimates of the effectiveness of each device or law in saving lives. For seat belts and motorcycle helmets, the table also estimates the numbers of additional lives that could have been saved if the devices had been used by more people.
